**Response to a non-final Office action under 37 C.F.R. 1.111**

**Summary of the prosecution**

20   Examiner mailed a first Office action in the above patent application on 9/18/200. As filed, the application contained 10 method claims. In his Office action, Examiner rejected claims 1-10 under 35 U.S.C. 102(b) as anticipated by U.S. patent number 5,335,343, Lampson, et al., *Distributed transaction processing using two-phase commit protocol with presumed-commit without log force*, issued 8/2/94, henceforth "Lampson", rejected claims 1-4 under 35 U.S.C.

25   102(b) as anticipated by U.S. patent number 5,917,998, Cabrera, et al., *Method and apparatus for establishing the status of membership sets used in mirrored read and write input/output without logging*, issued 6/29/99, henceforth "Cabrera", or by U.S. patent 5,452,445, Hallmark, et al., *Two-pass multi-version read consistency*, issued 9/19/95, henceforth "Hallmark".

30   Applicants are traversing the rejections based on Lampson and Cabrera and have replaced claim 1 with a new claim 11 to overcome the rejection based on Hallmark. Claim 5 has been amended to clarify it as have certain of the dependent claims. Additionally, new claims 12-31 have been added to obtain the full protection to which Applicants are entitled. Claims 12-21 are dependent Beauregard claims corresponding to claims 11, 2-10 as amended, claims 22-25 are apparatus

35   claims corresponding to claims 11, 2-4 as amended, claims 26-29 are apparatus claims corresponding to claims 5-8 as amended, and claims 30 and 31 are apparatus claims corresponding to claims 9 and 10. Applicants are finally amending their Specification to correct certain problems noted therein.
